Schedule Planner App

Goal:

Make an application for users to create and share their schedules in order to find the best time(s) for their meetings or outings in a simple and intuitive design.

Feature List:

- Owner conditions (restrictions, length of event, number of members, etc.)

- Simple design

- Ability to edit schedules (current, post)

- Link sharing

- See others' schedules (identify users)

Owner Conditions

Allows creator or owner of schedule to set conditions for the events such as length of time, members required to be present, etc.

Home	Settings	Username

Calendar Settings:

Meeting Length:

[_____] hrs

Minimum Member requirement:

[_____]

Calendar Length:
- ○ Week
- ○ Month
- ○ Year

Calendar settings such as length and minimum member requirements is only available to owner of calendar

Sharable Link

Link for members to invite others easily

Home | Settings | Username

Calendar Settings:

Link:

Member List:

Lorem ipsum dolor sit amet

consectetur adipiscing elit

Nullam tincidunt mauris ut nulla

Fringilla tristique

Donec eget mollis mauris. Donec.

Shown in setting page, allows other to see member list as well as share link

Includes option to copy link via button rather than drag and drop for ease of use

Member list and viewing individuals schedules

User can view other users and their individual schedules through member list

The schedule will then be shown on the main page with the same options as their own except for adding a new event/meeting
